Editorial

Prepared by
Mrs. Rawan Hazboun

During the month of July 2015 we received Dr. Nathalie Feodor Othman from Russia birth on the 1974, studied General medicine at St. Petersburg Pavlov State Medical University .

she finished her residency program at Holy Family Hospital Bethlehem from 2005 to 2008. and now she works as a Consultant in obstetric and gynecology with our Mobile clinic team.

Dr. Othman
OBC/GYN Consultant

since , we received our new mobile clinic on February 2013 and we are still performing a very excellent job reaching the modest forgotten places in the region of Bethlehem for giving a higher standard of care for the mothers and ladies who cannot reach our Hospital for any reasons.

It is purely humanitarian mission that was submitted and approved many years ago by the Order of Malta and the Daughters of Charity as a cornerstone of their mission “ the poorest deserve the best”.

Finally, we would like to thank everyone who is interested of the Holy Family Hospital, the hospital where there is always a place in the inn for all.

July's Activity

Health Education Session at the Arab Women's Union in Beit-Sahour

Following the great success of the Health Education Session that was held at Virgin Mary's Well Women Committee on June 15, 2015; the Arab Women's Union in Beit-Sahour requested from Holy Family Hospital to conduct another Health Education Session dedicated to the women over the age of 45 years. Accordingly, Dr. Dabdoub, the doctor responsible of our Over 45 well women clinic, conducted another session on July 20, 2015.

Dr. Dabdoub discussed all menopausal symptoms, how to deal with these signs and symptoms, and discussed what is needed in order to prevent and lessen the chronic conditions that may occur with aging. In addition, concentrated on the issue that women at this age are at higher risk of Cardiovascular Disease, Osteoporosis, Urinary incontinence, Overweight/obesity, Breast cancer, Abnormal Uterine Bleeding, Cervical cancer, Vaginal Dryness, joint pain, high cholesterol level and informed them about our services that we provide at our clinic to assist women in having a better quality of life during this age.

After the lecture, a long discussion was held; women had plenty of questions regarding the Menopausal symptoms and were very glade and pleased for attending this lecture. 20 women attended this lecture. Now with the two sessions that were held the hospital was able to reach and educate an additional 66 new women.

Dinner for the staff at Jacir Palace Hotel Bethlehem

To maintain the friendly relationships among the staff of Holy Family Hospital, the Management committee organized a dinner for its employees, almost 120 employees participated in it. They had a wonderful time filled with joy and amusement.

This year the dinner took place on the 17th July at Jacir Palace Hotel, a historical monument in Bethlehem close to the Hospital, to Rachel's Tomb, the separation wall. The nice food and the very pleasant ambiance in addition to the oriental music made the evening unforgettable.

The Management Committee is doing its best to keep and maintain the family spirit among its personnel.

Yasmine and Baby LARA

On Thursday June 18, 2015 very early in the morning Yasmine, a 24 year old housewife from Hebron, went into labor and rushed to Holy Family Hospital so quickly.

This is Yasmine's first pregnancy. Yasmine was following her pregnancy at a doctor outside Holy Family Hospital. Her doctor recommended that Yasmine should deliver at Holy Family Hospital since it is the safest hospital. After arriving to the hospital Yasmine was examined by a Midwife and a resident doctor.

Dr. Nihad Salsa', Medical Director, said " It was very early in the morning and I was getting ready to go to the hospital when my phone rang; the Resident Doctor diagnosed Yasmine to have umbilical cord prolapsed; a condition that threatens the baby's survival and immediate measures has to be taken. Within few minutes I was in the Hospital to find a great team work among the hospital staff starting from the Midwives, the Resident Doctor, the four OB/GYN Consultants, Anesthesia Doctor and the Operating Theater Nurses; the operating room was ready and the patient was already there".

Yasmine describes the situation saying "suddenly I saw more than five doctors surrounding my bed and within seconds I was sent to the operating room and a C/S was conducted"

During the surgery there was blood in the uterus, this is a condition called placental abruption which puts the mother and baby at jeopardy and any second is counted for saving the life of both the mother and baby.

Dr. Nihad Salsa', the Medical Director, said" the great team work among the hospital medical team was the reason behind saving the life of both the mother and baby. Within minutes the mother was sent to the operating room and the C/S was conducted and completed"

Baby Lara and Yasmine are in a very good condition; their lives were saved.

Departure of the Volunteer Midwife Ms. Annelise Caillod

Continuously to maintain the good work at our institution. In January, we were lucky to have Ms. Caillod as a volunteer Midwife, and now came the time to leave us. Ms. Caillod sadly left us, leaving an exceptional attendance record and an excellent work ethics.

we wish her the best of luck in her future challenge.
