New Equipments

Nitronox™ is the premier nitrous oxide and oxygen analgesia system designed to maximize patient comfort during some medical and aesthetic procedures where pain management and anxiety is a concern. This system enables practitioners to differentiate their practice and provide a treatment enhancement to improve the patients' overall experience.

The Connex Spot Monitor is designed to simplify and expedite procedures while providing accurate vital signs measurements. This monitor includes a NIBP module with BP averaging, and offers thermometry and pulse oximetry. The easy to use touchscreen displays spot checking, interval monitoring, and custom scoring across patient population.
